

Examination Question Paper

Practicum – Machine Learning March 2026

EXAM Type : Lab Exam

Module Name : Statistics Module (KMDC Practicum AIML March 2026)

SET: 1

DATE:

Duration: 2hrs

Max. Marks:40

Before perform any operation in statistic we use to import few inbuilt library like pandas ,numpy , stats

*# For plotting graph use seaborn and matplotlib.pyplot library #
import warnings library for ignoring any warnings*

Ques1:

For the given 'shoes_sales_dataset' fill in the missing numerical values by respective median value

- Print all the columns in the dataset
- Find the unique type of shoes and print the result
- Find the range of Units_Sold and print the result
- Find the mean and IQR of Price_USD.
- Find the 20th percentile of Units_Sold.
- Find mean Price_USD for shoes which are blue in colour
- Find and print which Sales_Channel is mostly used
- Find the type of skewness and kurtosis for Revenue_USD and print the conclusion
- Count values in the Brand column
- Draw the histogram for Brand of shoes

Ques 2:

Generate 500 values from a normal distribution with :

- Mean = 50
 - Standard deviation = 5
- Plot the histogram and comment on the shape. Calculate mean, median, mode of the data.
 - Convert the above data in skewed data.
 - Find the mean, median, mode of the skewed data and plot the histogram for the skewed data.
